DIVISION OF REVIEW

THE EVIDENCE STUDY SERIES

The EVIDENCE STUDIES were originally planned as a means of gathering evidence bearing unon various legal issues which prose under the National Industrial Recovery Act.

These studies have value quite aside from the use for which they were originally intended. Accordingly, they are now made available for confidential use within the Division of Review, and for inclusion in Code Histories.

The full list of the Evidence Studies is as follows:

- 1. Automobile Manufacturing Ind.
- 2. Boot and Shoe Mfg. Ind.
- 3. Bottled Soft Drink Ind.
- 4. Builders! Supplies Ind.
- 5. Chemical Mfg. Ind.
- 6. Cigar Mfg. Industry
- 7. Construction Industry
- 8. Cotton Garment Industry
- 9. Dress Mfg. Ind.
- 10. Electrical Contracting Ind.
- 11. Electrical Hfg. Ind.
- 12. Fabricated Metal Prod. Mfg. etc.
- 13. Fishery Industry
- 14. Furniture Mfg. Ind.
- 15. General Contractors Ind.
- 16. Graphic Arts Ind.
- 17. Gray Iron Foundry Ind.
- 18. Hosiery Ind.
- 19. Infant's & Children's Wear Ind.
- 20. Iron and Steel Ind.
- 21. Leather Industry
- 22. Lumber & Timber Prod. Ind.

- 23. Mason Contractors Industry
- 24. Men's Clothing Industry
- 25. Motion Picture Industry
- 26. Motor Bus Mfg. Industry (DROPPED)
- 27. Needlework Ind. of Puerto Rico
- 28. Painting & Paperhanging & Decorating
- 29. Photo Engraving Industry
- 30. Plumbing Contracting Industry
- 31. Retail Food (See No. 42)
- 32. Retail Lumber Industry
- 33. Retail Solid Puel (DROPPED)
- 34. Retail Trade Industry
- 35. Rubber Mfg. Ind.
- 36. Rubber Tire Mfg. Inc.
- 37. Silk Textile Ind.
- 38. Structural Clay Products Ind.
- 39. Throwing Industry
- 40. Trucking Industry
- 41. Waste Materials Ind.
- 42. Wholesale & Retail Food Ind. (See No.31)
- 43. Wholesale Fresh Fruit & Veg.

In addition to the studies brought to completion, certain materials have been assembled for other industries. These MATERIALS are included in the series and are also made available for confidential use within the Division of Review and for inclusion in Code Histories, as follows:

- 44. Wool Textile Industry
- 46. Baking Industry
- 47. Canning Industry
- 48. Coat and Suit Ind.

- 49. Household Goods & Storage etc. (DROPPED)
- 45. Automobile Parts & Equipment Ind. 50. Motor Vehicle Retailing Trade Ind.
 - 51. Retail Tire & Battery Trade Ind.
 - 52. Ship & Boat Bldg. & Repairing Ind.
 - 53. Wholesaling or Distributing Trade

THE WHOLESALE AND RETAIL FOOD AND GROCERY TRADE

(Codes Nos. 182 and 196)

GENERAL NOTES

The vast amount of data pertaining to the Wholesale and Retail Food and Grocery Trade differs widely according to the compiler's conception of the Industry. The material presented here is limited as nearly as possible to the fields covered by the two Codes Nos. 182 and 196. It in no way exhausts the sources of pertinent information, but it does present in compact form a great deal of carefully compiled and applicable data. For simplicity's sake, the figures have been drawn almost entirely from authentic Census sources.

Wholesale Food and Grocery Trade

Definition of the Industry

The term, "Wholesale Food and Grocery Trade," as defined by Code No. 196, includes

". . . all selling or supplying to retailers, industrial buyers, restaurants, or institutions, or the selling on the part of one wholesaler to another of food and/or grocery products, but shall not include the selling or supplying of meat products (except in cans), fish or the selling or supplying of fresh fruit and produce, and provided further the term shall not include the selling or supplying of any food or grocery product which is now or may hereafter be governed by a separate code."

Scurces

Most of the data presented in the following tables have been taken from the United States Census of Wholesale Distribution. In 1933, establishments with annual sales of less than \$1,000 were not covered by the Census canvass, while in 1929 all establishments were included. For this reason, Census data for 1929 and 1933 are not strictly comparable.

. The difference would materially affect the number of establishments but would have a negligible influence on the volume of business. Some of the detailed breakdowns published for 1929 are not available for 1933; consequently it is not always possible to present similar data for the two years.

The price data are U. S. Eureau of Labor Statistics material.

Comparability of Code and Census Classifications

Code No. 458 covers Wholesale Confectioners separately. Therefore, the industry subject to Code No. 196 is comparable to the Census classification, "Groceries and Food Specialties." In the 1933 Census, the classifications are somewhat different and it is necessary to combine "Groceries (general line)" and "Other food and grocery specialties" in order to get a comparable group.

Importers and exporters are included in the Census classification; there is some question as to whether or not they are covered by the Code. There is a separate code (No. 487) for the Importing Trade. However, whether a firm is subject to the Wholesale Food and Grocery Code or to the Importing Code is determined by the proportion of strictly wholesaling and strictly importing business that it does. There is no way of knowing exactly how many importing establistments operate under each code, but is likely that about 150 yer cent of them come under the Wholesale Food and Grocery Code. There has never been any definite interpretation of the Code with regard to exporters. It is assumed that, being wholesalers and not subject to any other separate code, they would be included: though they might be exempted from the trade practice provisions. Because of the practical impossibility of determining what portion of exporters and importers to exclude from the Code, and also because together they constitute such a small portion of the total (3 per cent of the establishments, 3.7 per cent of the net sales, and 2.4 per cent of the employees in 1929), it has seemed best to include them in the data presented here.

Trade Association

According to the testimony of Mr. M. L. Toulme at the Code Hearing on October 5, 1923, the most representative trade association is the National-American Wholesale Grocers' Association. This organization is a merger of the National and the American Wholesale Grocers' Associations, and has 1,798 dues-paying members representing every state in the Union.

Retail Food and Grocery Trade

Definition of the Industry

According to Code No. 182 the term "Retail Food and Grocery Trade" shall mean

"... all selling of food and/or grocery products to the consumer and not for purposes of resche in my form, out shall not include the selling of food in restaurants for consumption upon the premises, or the selling of confections in confectioners' stores, or the selling of milk or its products by delivery from house to house upon regular routes, or the selling of bakery products in bakery stores. It is provided, further, that the term shall not include the selling of any food or grocery product which is now or may hereafter be governed by a separate code."

A retail food and grocery establishment is defined as

"... any store, department of a store, shop, stand, or other place where a food and grocery retailer carries on business other than those places where the principal business is the selling at retail of products not included within the definition of retail food and grocery trade."

.

•

Sources

Practically all of the data in the following tables have been compiled from the U. S. Census of Retail Distribution in 1929 and 1933. Some of the figures have been gleaned from Dun and Bradstreet and the Eureau of Labor Statistics. All sources are clearly indicated in the footnotes.

Comparability of Code and Census Classifications

Since the Retail Meat Trade is covered by a separate code, the industry subject to Code No. 182 corresponds fairly well with the sam of the two Census classifications, "Grocery Stores (without meats)" and "Combination Stores (meat and grocery)" --- with two minor qualifications:

- 1. Under the Code, all grocery departments in department stores are included. However, no data on such departments are available and consequently no attempt has been made to adjust the Census totals to include them. Their effect on the total would probably be negligible.
- 2. The Industry as defined by the Code includes delicatessen stores. The Census gives separate data for delicatessen stores in 1929, but not in 1933. Therefore, in order to keep the data for the two years comparable, delicatessen stores have not been included in either year. In 1929, the inclusion of delicatessen stores would have made a difference in the totals of 3.6 per cent in number of establishments, 2.5 per cent in number of employees, and 2.6 per cent in net sales.

Adjustment for Exclusion of Small Towns

To make the Census classifications more nearly fit the Code coverage, a further adjustment is necessary. Under Executive Order #6354, all places having a population of 2,500 or less are exempt from the Retail Food and Grocery Code. Statistical data on retail trade for this group are very limited. The estimates used in the Statistics Unit computations are based on all pertinent Census data that are available and on the following assumptions:

• :

- 1. That the ratios of stores and of sales in places of 2,500 or less to all stores and all sales respectively were the same in 1933 as in 1929. Census figures show that this was true of places of 10,000 or less.
- 2. That the ratio of greery stores and combination stores (meats and greeries) to all food stores was the same in places of 2,500 or less as in places of 10,000 or less. This applied to both number of stores and net sales.
- 3. That the average number of employees (full-time and part-time) per establishment was the same in places of 2,500 or less as in places of 10,000 or less; that this ratio was slightly lower in 1923 than in 1923.

The estimates made under these assumptions are:

	<u>1929</u>	1933
Number of stores in places of 2,500 cr less	275 of all stores	27% of all stores
Net sales in places of 2,500 or less	17% of all sales	17% of all sales
Number of employees in places of 2,500 or less	l.l per establish- ment	l per estab- lishment

Where data have been adjusted as explained above, the fact is noted. If no adjustment is noted, the figures include all places.

Labor Data

While the Census furnishes information on employment and aggregate wage payments, there is no source of information on wage rates and hours of labor. The Industry Statistics Unit has computed, from a Bureau of Labor Statistics sample, an average weekly earnings figure of \$19.23 in 1934.

Financial Failures

Adequate data on failures in the Retail Food and Grecery Trade as defined by the Code do not exist. However, Dun and Bradstreet (Current Analysis of Insolvency Trends, February 28, 1935, p. 10) estimates 1,465 failures in 1954 among the establishments under the Retail Food and Grecery Code.

Per cent of net cales is based upon only those establishments reporting rent. For this reason the detailed percentages do not always add to the same figure as total expenses.

b/ Not under the Code for the Wholesale Food and Grocery Trade.

All Other Types comprise drop sulppers, cooperative marketing associations, assemblers of farm products, etc.

The figures are not adjusted for places of 2,500 or less in population, which are exempt from the Code. The total average number of full-time and part-time employees subject to the Code (see explanation, p. 4) is as follows:

Year	Employees
1929	352,263
1933	372,231
1934	409,000

The 1934 estimate is obtained by applying the per cent change in the Bureau of Labor Statistics sample to the Census base.
